

IsoTube Gas Sampling Manifold

Box of 25 IsoTubes with HAZMAT Shipper

IsoTube Septum Valve

IsoTube[®]

Gas Sampling Equipment

For mudgas sampling:

- Extremely durable and reliable, resulting in reduced sample loss.
- Easier to use than gas bags.
- Less bulky to store than gas bags (shipped 25 per box).
- Can be configured in line with the normal mud-logging equipment.
- Can be legally shipped on both passenger and cargo aircraft according to IATA regulations.**
- HAZMAT packaging is included. UN certified shipping boxes meet all DOT and IATA requirements for shipment of flammable gases in IsoTubes.
- HAZMAT packaging was developed and tested specifically for use with the IsoTubes.
- Environmentally “friendly” IsoTubes are >99.9% recyclable; IsoTubes returned to Iso-tech result in a substantial reduction in waste compared to gas bags.

As a substitute for cylinders:

- IsoTubes are acceptable for pressurized sampling (limit: 100 psig; requires IsoTube Wellhead Sampling Device).
- IsoTube shipping boxes are approved for air shipment, so rapid return of samples to the laboratory is facilitated.
- Smaller size and weight result in a reduction in shipping costs (volume ~110 ml).

**** (Hazardous materials can only be shipped by someone properly certified to do so; shipping instructions are included with each box of IsoTubes)**

PRICES

IsoTubes	
(1 box of 25; includes HAZMAT shipper).....	\$625
IsoTube Gas Sampling Manifold.....	\$980
IsoTube Wellhead Sampling Device	\$400
IsoTube Septum Valve.....	\$40
Extra IsoTube HAZMAT Shippers	\$10

Associated Analytical Costs for Mudgases:

Compositional analysis (per sample)	\$66
Isotope analysis (per component; C ₁ -C ₃)	\$66

SHIPPING, DUTIES, TAXES, ETC. NOT INCLUDED IN ABOVE PRICING
